## Big Monkee Business

By SCOTT HOLTZMAN

The Monkees' new single had an advance sale of 1,051,280. Guess that shows who the new Number 1 group is. KNUZ is sending Buddy McGregor out to Hollywood this week to visit with them and send back interviews. That should make Cindy Soo and the Monkeanuts happy.

The Beach Boys' new LP album will be called "Smile." Believe it or not, "Good Vibrations" looks like their FIRST gold single. I'm very surprised they haven't had one before.

I still say Sinatra has a hole in his pasta-fa-soul.

I GET many letters about the Walker Bros. I agree that they are one of the best groups in the world. They do have releases regularly. It's just that nobody here plays them. There is a feeling of "They're Americans who prefer England. Let 'em stay in England!" Funny world...

Ran into Byron Selman, who was a winner in my "DJ-talk" contest. He didn't receive his prize. The LP's were sent out weeks ago, so if any of you

others didn't get yours, let me know immediately.

James Bond's implausible cheerfulness in the AM is only exceeded by his peccable taste (never trust a morning DJ!).

King Kirby gets great response to his reading of Gibran's "The Prophet" on his night show.

GOOD ARTICLE and pix on John Lennon in the new Look. He explains his religious feelings a bit further.

THE SIXPENTZ were not being rude to the Lovin' Spoonful by singing "Summer In The City" on their show here. The Spoonful asked them to sing it.

They wanted to hear someone else do it. One reporter mistakenly described the Spoonful as psychedelic. They are about as psychedelic as Barbra Streisand! I got a good interview with John Sebastian that I will be printing soon.

It is a shame that one or two groups can give all R&R musicians a bad name. Since I have been associated with this business in Houston, I have met very few groups that even drink, much less get involved in narcotics. Don't let one rotten apple spoil the barrel for everybody. Birds of a feather do not necessarily flock together. Hang 10 1/2!
